

GEL PACK

data sheet

NAME:

Gel Pack.

DESCRIPTION:

Plastic bags containing eutectic gel. Rectangular shape, 250 g.

QUANTITY AND PACKAGING:

6 kg carton (24 pieces), gel packs can also be sold by the piece.

METHOD OF USE:

Freeze before use. Take care not to puncture the bag, to prevent the gel from escaping. Once thawed, the gel pack can be refrozen several times for re-use.

STORAGE CONDITIONS:

Store gel packs in a cool, dry place, in their own packaging to avoid punctures or cuts. To keep the gel packs ready for use, you can store them in a negative cell, stored in containers protected from dust and risk of the plastic breaking.
