

## PERLON CLOTH

### *data sheet*

#### NAME:

Perlon cloth.

#### DESCRIPTION:

Synthetic plastic wool cloth (Perlon) suitable for pre-filtration systems.

#### QUANTITY AND PACKAGING:

The cloth is marketed by the metre, rolled up and strapped for transport.

#### METHOD OF USE:

Cut the Perlon cloth as required and insert into the pre-filtering compartment where provided, or place over the water flow of the drains to collect coarse debris. Once the cloth has become saturated with dirt, it can be washed and used again. Replace it when it can no longer be cleaned or when the Perlon becomes brittle and loses structure, and can no longer retain dirt.

#### STORAGE CONDITIONS:

Store the Perlon cloth in a dry place, protected from dust and dirt.
